BiobiN®
A clean and simple solution to manage organic materials

WHAT IS MY PLATE MADE OF?
The plate you’re eating off of is made from 100% natural palm leaf products.

WHY DID WE CHOOSE THESE PLATES?
Your plate is eco-friendly and biodegradable. These plates are disposable and degrade quickly, leaving no pollution.

HOW DO THEY DEGRADE QUICKLY?
Through the use of our BiobiN®, which is our on-site capture and containment system. The BiibiN® is used to start the composting process.

WHY DO WE USE THE BiibiN®?
Because it minimizes odor, decreases waste collection frequency, and reduces greenhouse gas emission.
