How to Buy Radioactive Materials

The Office of Environmental Health & Radiation Safety (EHRS) is responsible for the managing the procurement of all radioactive materials. All radioactive materials received in the lab must be approved by EHRS before the order is placed, including purchases from a radioactive material supplier, purchases from EHRS, gifts, transfers from another Licensee, and transfers from another institution.

All questions related to the procurement of radioactive materials are to be directed Eileen Normoyle at 215-898-2134.
