**Featured Products**

**Fisher Chemical™ Optima™ Acetonitrile with 0.1% Formic Acid**
Ideal high-purity mobile phase blend for LC/MS and UHPLC-UV applications.

Catalog Number: LS1201

**Honeywell Burdick & Jackson™ Water for HPLC and Spectrophotometry**
Suitable for gradient elution HPLC and other chromatographic assays; low UV absorbance, organic carbon, and particulates.

Catalog Number: 60-026-52

**Fisher Bioreagents™ Tris Base**
Buffer component used in molecular biology, tissue culture, and electrophoresis.

Catalog Number: BP1525

**TCI America™ 2,3 Dimethylbutane**
A highly flammable isomer of hexane, used to extract vegetable oils from crops, as a cleaning agent, and as an ingredient in special glues and other compounds.

Catalog Number: D0690500ML

**Alfa Aesar™ REacton™ Neodymium (III) Oxide**
Used as a dehydrogenation catalyst in ceramic capacitors, coloring glass, carbon arc-light electrodes, and color TV tubes.

Catalog Number: AA4025222

**SPEX CertiPrep™ Sodium Thiosulfate Solution**
Prepared using double-deionized ASTM Type I Water and packaged in a cubitainer to maximize matrix shelf life.

Catalog Number: 182002

**Acros Organics™ AcroSeal™ n-Butyllithium**
An organolithium used as a strong base ("superbase") in organic compound synthesis and in the production of elastomers.

Catalog Number: AC181271000

**Accucore™ Biphenyl Reversed Phase LC Columns**
Provide fast, high-resolution separations without the elevated backpressures seen using sub-2µm particles.

Catalog Number: 03-251-528
